

World-Class Innovation. Powerful Connectivity. Unrivaled Results.

Live Connections for LTL Carriers

Find out how Live Connections, Banyan's premier connectivity platform, gives Less Than Truckload Carriers a competitive edge in today's shipping logistics market.

Stand Out with Live Shipper Connectivity

Replace tedious manual processes, static rate tables and outdated EDI technology with live API connectivity to secure and manage shipments faster and more efficiently.

Whether you're using your dispatch system or are looking to invest in a technology solution through a leading Banyan partner, Live Connections will plug you into the TMS community — connecting you with shippers across North America in real time for instant, two-way communication.

- **Improve operating efficiency with partner carriers through live rating, tendering, tracking, image documents, and invoicing**
- **Automate dispatch and electronic bills of lading (EBOL)**
- **Leverage dynamic pricing to maximize asset utilization and reduce single-bill pickups**

FULL TRUCKLOAD

Connect with your partners to automate and manage the end-to-end FTL lifecycle in real time.

LESS THAN TRUCKLOAD

Easily connect with and compare LTL partners to find the best shipping options at the best price for your load.

LOCAL CARRIER

Quickly connect with hundreds of local carriers through a single API to provide Amazon-level delivery solutions.

The Banyan Difference

Banyan's Live Connections platform provides more than your average API partner. After all, APIs are just one part of the total picture of live carrier connectivity.

Live Connections easily integrates with the systems your business is already using for seamless operations — including Dispatch, Quickbooks, and ERP — to facilitate live rating, end-to-end tracking, invoicing, and documentation functionality, all through the same API.

More Than 34,000 Users Trust Banyan's Award-Winning Software

Intelligent Pricing

Provide competitive rates and land more business with the industry's first true dynamic pricing tool. Create custom rules to make adjustments at the lane level to a filtered cross section of your client base. Offer client- and contract-specific pricing adjustments based on load attributes and client behaviors. These adjustments appear directly in your client's workflow as they're making routing decisions.

Local Carrier

Connect with hundreds of local carriers across the country quickly and easily to provide in-demand shipping solutions including: wider regional coverage, faster shipping speeds, specialty services including white glove, assistance with late and missed pickups, and expanded delivery and return options.
