

World-Class Innovation. Powerful Connectivity. Unrivaled Results.

Live Connections for Shippers

Banyan's premier platform gives shippers and Third-Party Logistics Providers (3PLs) a competitive edge with connections to more than 1,400 carriers.

Go Beyond Visibility Across Modes:

PARCEL

Connect to leading parcel capacity providers to automatically find the best rate and service options.

GROUND WITH FREIGHT PRICING

Integrate directly with the UPS Ground with Freight Pricing program.

LOCAL CARRIER

Connect with hundreds of local carriers through a single API for expanded shipping, delivery, and return options.

LESS THAN TRUCKLOAD

Easily connect with and compare carriers to find the best service options at the best price for your load.

VOLUME LTL

Secure real-time LTL freight quotes quickly and efficiently, with rate comparison automation.

FULL TRUCKLOAD

Automate manual, time-consuming tasks and manage the end-to-end FTL lifecycle in real time.

The Banyan Difference

Banyan's Live Connections platform provides live rating, end-to-end tracking, documentation, invoice retrieval functionality, and advanced features through a single API or UI — so you can better manage your freight, from first to last mile.

Systems Integration

Local Carrier Connectivity

Automated V-LTL Pricing

Live Rate Specials

UPS Ground with Freight Pricing

UPS Integrated Insurance

Ship Faster and More Efficiently

Whether you're using your TMS or our user interface, our API hub syncs with your carrier network in real time for streamlined, two-way communication.

- **View and compare quotes**
- **Eliminate rate table maintenance**
- **Increase direct negotiating freedom**
- **Automate tendering/dispatch**
- **Live tracking, document retrieval and analytics**
- **Automate freight bill exception auditing**
